

**Government College of Nursing Baramati**  
**Report on “CNE (Safe Delivery: Road to keep Motherhood Healthy)”**

**CNE ON**  
**Safe Delivery:**  
**“Road to keep**  
**Motherhood Healthy”**

Safe delivery refers to the healthy, complication-free birth of a baby or the secure, unharmed arrival of a package. In a medical context, it involves skilled care, proper prenatal monitoring, and managing risks.

**Key Factors:-**

- Comprehensive Prenatal Care
- Skilled Attendance at birth & Facility delivery
- Awareness of danger signs
- Labor Support
- Proper post natal Monitoring.

**Venue:** - Central Auditorium GMCH Baramati.

### **Introduction**

In nursing, CNE stands for Continuing Nursing Education referring to professional development activities nurses complete to update skills, knowledge, and maintain licensure, but it can also mean Certified Nurse Educator, a specific credential for educators focusing on teaching, curriculum, and assessing student nurses. Both types of CNE aim to improve patient care by keeping nurses current with best practices, new technologies, and leadership skills, with formal CNE credits often required for license renewal.

"Safe delivery" generally refers to either secure, damage-free logistics and courier services or, in a medical context, evidence-based practices for childbirth. In logistics, it involves secure packing and careful handling. In maternal health, tools like the Safe Delivery App assist healthcare professionals with emergency care to ensure safe births.

The entire program was conducted by Government college of Nursing Baramati and Program starts with felicitation of the guest done by Mrs. Mrudula Phule Principal of GCONB did Vice Principal followed by Theme Opening. Followed by session was started 1st session was conducted by
